Gbif.es

Chamilo Skills

The skill wheel is just a way to represent the skills a user can get

At the beginning our wheel skill is empty as we can see on this right image

Gbif.es

Skills

Hierarchy in the skill wheel

Gbif.es

Manage skills

+ Create skill   **◎ Skills wheel**   **🛡 Badges management**   **⬆ Import skills from a CSV file**

Manage skills

Badges	Name	Short code	Description	Opti
	Root	root		
Badges	**Name**	**Short code**	**Description**	**Options**

Two different ways

By clicking on this **+**

Or importing a csv archive with all our skills

Chamilo

Gbif.es

Manage skills

If the skill does not have a parent it can not be represented in the wheel because of the hierarchy system

Create skill

Gbif.es

Manage skills

The other option is select a csv archive. Chamilo provide us one as example

Administration / Manage skills / Import skills from a CSV file

☰ Manage skills   **◎ Skills wheel**   **🛡 Badges management**

Import skills from a CSV file

Import marks in an assessment

Seleccionar archivo Ningún archivo seleccionado
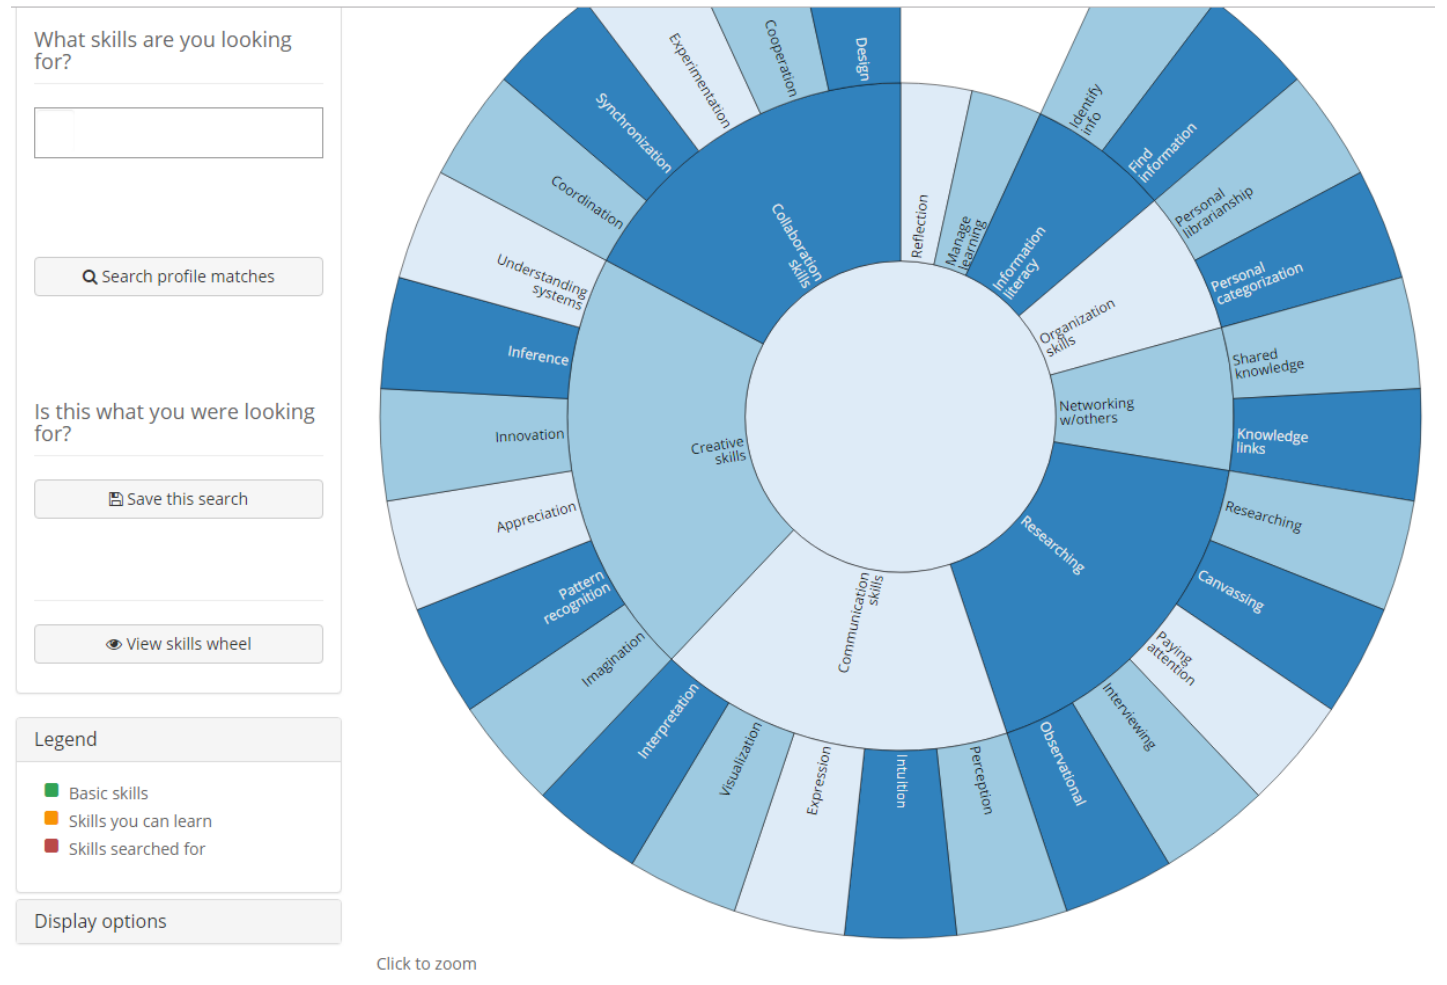

File type   ⊙ CSV (Example CSV file)

✔ Import

The CSV file must look like this (Fields in **bold** are mandatory.) :

```
id;parent_id;name;description
2;1;Chamilo Expert;Chamilo is an open source LMS;
```

Chamilo

Gbif.es

Manage skills

As a result of the importation we get this wheel which represents the skills hierarchy from the archive csv

Chamilo

Manage skills profile and levels

We need to add a new profile and the level for the skills

Administration / Manage skills levels

Skills

- Add profile
- Add level

Root (root) ✏️
Reflection () ✏️
Manage learning () ✏️
Information literacy () ✏️
Organization skills () ✏️
Networking w/others () ✏️
Researching () ✏️
Communication skills () ✏️
Creative skills () ✏️
Collaboration skills () ✏️
Identify info () ✏️
Find information () ✏️
Personal librarianship () ✏️
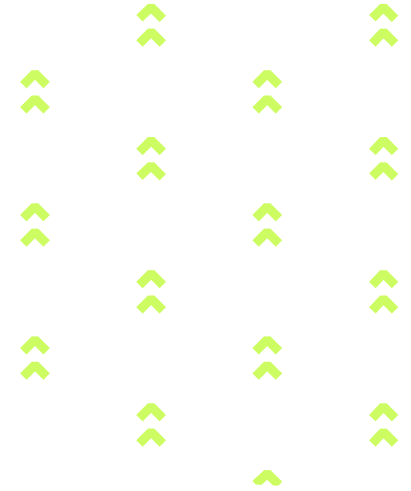

Manage skills profile and levels

We create the Default profile and three levels Basic, Medium and Advance

Chamilo

List

* Name [   ]

✔ Save

* Required field

Administration / Skill profile

Add

Name	Short name	Profile	Detail
Basic	B	Default	🖉✖
Medium	M	Default	🖉✖
Advance	A	Default	🖉✖

Manage skills levels

For the skills we have imported from the csv archive we can asign a the profile we have created (Default)

As a result now the skill Reflection looks like this

Administration / Manage skills levels / edit

List

Skills

- Add profile
- Add level

Reflection

Profile   Default ▾

Open Badges

Is a digital indicator of an achievement or a skill learned online or offline. It is an image file (PNG) which contains metadata (json) about: the date of the issue (and the expiration date), the issuer and the earner, the evidence verifying the credential

A badge is a visual representation of the skill acquired. The first and second level skill are never going to be acquired by the users so we should not assign badges to these first two levels since they are really classifications of the skills

Gbif.es

Open Badge

We can distinguish three important things:
- Description of the skill
- Criteria to achieve the badge should also be as explicit as possible
- Design the logo
